RAJYOG-THE HOLY SCIENCE OF SUPREME FATHER GOD SHIVA TO ACHIEVE ANGELIC STAGE

Introduction:

Today by seeing the present world's scenario the complete human race looking up to India & its ancient meditation for upliftment of the complete humanity from its present downfall hence everyone wants to learn India's ancient meditation 'Rajyog'. But in India people are practicing various types of meditation techniques due to which the complete humanity is in puzzled condition and mislead by the meditation teachers. Hence, humanity is searching for the special meditation technique by which there will be complete revolution of self and present world will be transformed into paradise. Let us know the highest technique of meditation in India by which human souls can achieve the highest spiritual stage. To know this type of meditation technique, firstly we must know the basic difference between 'Yog' & 'Yoga'.

Today whole world is practicing 'Yoga' which is nothing but 'Hathayoga' (i.e. physical postures). 'Yog' is related to soul (i.e. spiritual energy). Hence in 'Yoga', we are unable to achieve highest spiritual state & one can achieve only physical health and very little mental healthiness. Till today, the meditation techniques practiced across the world are taught by human beings to each other. Human beings are practicing these meditation techniques from thousands of years but they are unable to achieve the highest spiritual state & transformation of this world into paradise. It means that there are some

lacunas present in these meditation techniques which are used across the world due to which there is spiritual no enlightenment of the complete humanity. Then which is the best method of meditation by which there will be complete rise and welfare of humanity. As the supreme power (i.e. GOD Shiva) is bodiless, the unborn, the non-experiencer and the highest spiritual energy of the universe, only one can teach the highest and best method of meditation which is known as India's ancient meditation 'Rajyog' In 'Yoga' the practitioners are trying to activate 13 energy centers of their body through different physical postures. But in 'Rajyog' the practitioner directly charge the 13 energy centers present in the soul by connecting intellect with Supreme Father GOD Shiva and by which body's 13 energy centers get charged automatically. The time of learning 'Rajyog' is only at once in the whole cosmic cycle (i.e. Kalpa) of 5000 years in which the souls are achieving their destiny of 84 births. This is time of ending of the Iron age and starting of Golden age in which soul's supreme Father GOD Shiva has manifested Himself to teach Rajyog through His human corporeal medium of Prajapita Brahma in 1936 at Mount Abu Rajasthan in India. The human souls which practice Rajyog from GOD Father Shiva can regain their lost divine values & powers and can attain highest spiritual state. By practicing Rajyog, the soul can transform to himself into his original form and energy level. Rajyog is also known as loving remembrance of GOD Father Shiva by soul through connecting his intellect to Him.

If we want to adopt the 'Rajyog' meditation in our daily life, we must know the divine geometry of soul, GOD and universe. In this 'Rajyog' meditation commentary, the visualization about charging of soul's 16 energy points of values & powers and destruction of black holes present in the intellect when connected to GOD Father Shiva are clearly shown. By practicing this meditation commentary, it is very easy

that soul will be free from all bondages of Karma (i.e. Karmitit stage) and will fly by becoming an Angel.

Soul Divine Geometry:

The relation between Soul's 16 energy points of values & powers, their colors, serpent power energy centers and physical world elements are as below.

1. Joy, Yellow Color (Fire Element)
2. Love, Green Color (Air Element)
3. Determination, White Color
4. Politeness, White Color
5. Introvertness & Power of Truth, White Color
6. Power to Face, Red Color
7. Power to Discriminate, Red Color
8. Power to Co-operate, Red Color
9. Power to Tolerate, Red Color
10. Peace, Blue (Sky Element)
11. Purity, Orange Color (Water Element)
12. Power, Red Color (Earth Element)
13. Bliss , Power to Pack up, Satisfaction, Violet Color (Angelic State,)
14. Power to Withdraw, Violet Color (Conscious Mind)
15. Power to Adjust, Pure White Color (Unconscious Mind)
16. Knowledge, Power to Decide, Indigo Color (Aether Element, Intellect, Sub Conscious Mind)

Soul is a spiritual energy and GOD is a metaphysical highest power in the universe. Soul can be described as a shining star in the center of forehead hence **his** divine geometry is like a star. As our soul's consciousness goes on moving through these 13 energy points of the

soul and accordingly serpent power is also flowing through our body's 13 energy centers. In Golden age, 16 energy points of soul were completely charged and fully activated due to which deities in that age were full of 16 arts. Also the soul's consciousness field was spread like a lotus shape. In Golden, Silver, Copper and Iron ages, soul's consciousness remains in energy point numbers 13th, 11th, 8th, 1st and serpent power remains in astral, third eye, throat, root energy centers and deities are having 16, 14, 8 and 0 arts respectively. In Golden and Silver ages, there is a subtle divine connection of 15 energy points with intellect's point number 16. As time passes, the souls utilized their divine qualities and powers but did not charge these energy points due to which there is shifting of soul's consciousness on lower side took place. In Copper age, there was major loss of soul's qualities and powers due to which soul became body conscious and came under the influence of sex lust due to which there were formation of black holes in the intellect (Point no. 16) by which the soul lost the subtle divine connection of all energy points with the intellect and mind got split into conscious & sub conscious. The black holes present in the intellect are known as the memory lock (i.e. lock of Godrej). As the power of purity of soul goes on decreasing the subtle organs mind, intellect and resolves tried to take control over the consciousness and became ruler of our soul. By continuously practicing GOD Father Shiva's 'Rajyog', soul will achieve self sovereignty and can control and rule his subtle organs mind, intellect and resolves.

GOD Father Shiva's Divine Geometry:

GOD Father Shiva is an unlimited and infinite source of values, and powers. GOD Shiva has 32 numbers of energy points in which 14 are His qualities and 18 are His duties. In Soul world, there are three soul like shapes which are shown below GOD Shiva but these three are His

energy levels of creation, preservation and destruction. These three energy levels are also known as Drama's mind, intellect and resolves. GOD Father Shiva utilizes these energy levels for creation, preservation and destruction through Brahma, Vishnu and Shankar respectively. In Vishnu form Laxmi & Narayana are combined likewise in Brahma form Brahma-Sarswati and in Shankar form Shankar-Parvati are combined. In GOD Shiva's sacred geometry, at the center point, He is shown in oval shape in which His mind, intellect and resolves are in combined form due to which there is no creation of thought inside hence He is known as stable consciousness. GOD Shiva can bring His qualities and powers into work when He Himself manifested in Prajapita Brahma's human corporeal medium. Hence all the qualities and powers of GOD Shiva are shown on His creation energy level. It is an ultimate truth that GOD Father Shiva is like an ocean of qualities and powers & during meditation when we souls concentrate on Him, we will also become a master ocean of qualities and powers.

Universe Divine Geometry:

If we know the real divine geometry of the universe, it is very easy to perform 'Rajyog' meditation and **world's service on mind level (i.e. Mansa Seva)**. The universe divine geometry consists of triangles, cones, ovals, lines, circles like diagrams. The universe divine geometry is like a Nanohedron which is similar to that of Aether O₉. The energy levels in universe are as shown from lowest to highest level.

1. Earth
2. Water
3. Fire
4. Air
5. Sky
6. Different Religion founding fathers and souls of their religion

7. 108, 16108, 9 Lakh, 33 Crores Deities souls
8. 14 Souls of 8 Gems
9. 2 Souls of 8 Gems (Brahma & Sarswati)
10. GOD Father Shiva

There are 10 main energy levels present in the universe but at each and every point in the universe the energy level is different. In physical world, the Polaris star is on the top, then 7 stars (i.e. Saptrshis), 108 star, 16 000 stars, 9 lakh stars, Sun, Moon and 9 planets are present. GOD Father Shiva and His energy levels of creation, preservation and destruction consciousness fields are shown in circular pattern. GOD Shiva is in the 10th dimension where all the forces of the universe are combined. GOD Shiva is stable at one point but His consciousness field is continuously rotating in clock wise direction by which there is a rotation of souls in cosmic world, planetary system and earth's core through Aether O₉ medium.

Rajyog Meditation Techniques:

In Golden age, we souls were full of 16 arts and none of the art remained at the end of Iron Age. There is only one way to regain the 16 arts of soul with loving remembrance of GOD Father Shiva through 'Rajyog'. When soul remembers to GOD Shiva then **he** will be charged through His very powerful light and might. As a soul continuously goes on remembering the GOD Father Shiva, **he** starts to regain his original form and condition. While performing 'Rajyog', it is necessary to tie a knot to the intellect that we must remain pure as we have lost our divine qualities by our misconducts (**i.e. bad karma**) in the past. We can tally our account how much we have acquired and lost from GOD Shiva through 'Rajyog' and how much is the balance. With this balance, one can get to know his eligibility as to whether we are able to acquire a seat of emperor and empress in forth coming Golden age. GOD Shiva says

keep in mind that your account sheet will be tallied at the last and based on this your seat for the Golden age will be fixed.

Now time is also in its last and final phase, still we can achieve the highest seat in the forth coming Golden age. This is not a thing for a single birth but it is the fortune for complete cosmic cycle (i.e. Kalpa) and it is the last, final time and chance to acquire it. Keep it in mind NOW OR NEVER.

With this method of 'Rajyog', it is very easy to charge all the 16 energy points of the soul completely. We must know the original form of soul and our most beloved GOD Father Shiva for practicing this technique of meditation. After knowing the original form of soul and GOD Father Shiva, it will be very easy to practice 'Rajyog' and within very short span of time, we will be full of 16 arts.

I, the soul being a point of divine light with star shape geometry having 16 numbers of energy points which include mind-intellect-resolves, five elements, Aether, all qualities and powers. Purification of Elements through soul's seed stage:

This is the highest stage in Rajyog and to experience this stage, the soul has to stay in soul world which is beyond this physical world. Supreme soul GOD Father Shiva in 10th & Mamma-Baba is in the 9th energy level. If the center points of these souls are joined by three lines, it will form a triangle. If we draw a line from supreme soul which will intersect a line connecting souls of Mamma-Baba in a point & at this point soul has to stay in the soul world. This point is known as highest spiritual energy point for meditation and for this soul has to reach and stay at this point time to time so that we can achieve seed stage of the soul very early. From this highest spiritual energy point, it is possible to spread very powerful spiritual energy rays into the physical world and this position is very powerful for Mansa Seva. The soul may leave his physical body and become angel if he performs meditation at this highest spiritual energy point for 2 days (i.e. 48 hours).

Amazing Drill of 5 Forms and 5 Dhams (homes):

As per directions of Baba, we yogis performing drill of 5 forms and 4 Dhams daily. Now, we will learn amazing drill of forms and dhams jointly. In 5 forms there are Atma (soul), Devata (deity), Pujyaniya (adorable), Brahmin, Angel and in 4 dhams there are History Hall, Baba's Hut, Baba's Room and Tower of Peace (Shantistambh). There is a great importance of these 4 dhams as for long period there was presence of GOD Father Shiva in human corporeal medium due to which these homes are fully charged with GOD's Ultra High Energy. The soul will be charged with this Ultra High Energy of GOD when he will perform this drill frequently. If we add Paramdham (i.e. silence world) into 4 dhams then there will be total 5 dhams. To make soul very powerful within very short period we will perform drill of 5 forms & dhams jointly.

1. I, the soul being face to face to GOD Father Shiva in Paramdham charging my 16 energy points. And after charging of my 16 energy points, I became master sun of knowledge and destroying world's darkness due to ignorance.
2. I am in the form of Vishnu's deity present in History Hall face to face to Bapdada (GOD Shiva & Brahma combine form). Bapdada gifting me weapon of knowledge, Chakra of Yog, Conch of service and Lotus of Dharana. I, the deity becoming full of 16 arts, completely vice less, Maryada Purushottam and double non violent.
3. I am in the form of worship deities like Ganesha or Durga present in Baba's hut & doing welfare of complete humanity and my these forms are worshipped at home and in temples.
4. I am in Brahmin form seated in lotus throne in Baba's Room face to face to Bapdada, He has blessed me with the third eye, knowledge of time and three worlds. I have become similar to that of Brahma Baba in all respect and doing welfare of whole world.
5. I have become an angel like a Brahma Baba and standing in front of Shantistambh (i.e. Tower of Peace) holding the hand of Bapdada's angelic form and flying in the universe and spreading rays of light and might of purity, peace, love, joy and bliss.

At last I have reached at subtle world and removed the light form costume and become a point of light and reached to soul world again, in this way one cycle of drill of 5 forms & 5 Dham has been completed. In a day if we complete this drill 21 times our 5 forms will be clearly visible to us very soon. To keep mind and intellect busy, we can use the chart in cyclic pattern.

Now, time is in its last and final phase still we can acquire highest position in forth coming Golden age. This is not the case of only

one birth but it is the last, final time and chance to achieve our fortune for a complete Kalpa (i.e. cosmic cycle).

....Please remember, Now or Never for each Kalpa.

.....OM SHANTI.....
